The sinking included the 345-ton British trawler Wigmore with a crew of 16 and the 1,267-ton British Collier Torchbearer which were disclosed today. Four survivors of the Torchbearer's crew, reported to have numbered 13, were landed at an English port.

In addition the sinking of the 4,288-ton British freighter Penultima "by enemy action" was disclosed today. It was not immediately clear whether the vessel was a mine victim. Her crew was landed safely.

A total of nine vessels were reported sunk in the North Sea over the week-end, with 177 persons dead or missing. The total tonnage lost was 32,008. Neutrals lost five ships, totaling 4,288 tons.

### AIR RAID.

Run, children, run!  
Burrow underground.  
Quit the morning sun,  
Airships flying round!

Run, mothers, run!  
Deep in dungeons stay,  
Till the danger's done,  
Huddle there and pray.

Haste, nurses, haste!  
Heed that warning sound!  
You've no time to waste—  
Scuttle underground.

Cripples, lest you die,  
Faster must you crawl!  
Soon from ships on high  
Awful death will fall.

Parson, flee from prayer!  
Shopman, run from trade!  
Now the sirens blare,  
Signal of a raid!

## THE WORST HAS NEVER COME

The Rev. George Lawrence Parker of Keene, N. H., is not disturbed by the supposed evidence of ruin and chaos on every hand. Mr. Parker has read widely. He has found in many books proof that chaos is not particularly modern and that civilization has been tough enough to survive it and push forward again. In a recent letter to the New York Times, the preacher quotes a few old timers on this subject.

From a papyrus in the museum at Istanbul, one of the oldest known pieces of writing: "Alas, times are not what they used to be. Children no longer obey their parents, and everyone wants to write a book."

From the Diary of John Evelyn, 1663: "The disorder of Europe is due to defection at home, a wanton peace, irreligion and atheism, great ingratitude and self-interest, every moment unsettling the old foundations, and never constant to any one thing. Germany is drawing toward Vienna and France is swallowing up almost all of Flanders."

In 1849 Benjamin Disraeli wrote: "In industry, commerce and agriculture there is no hope."

Two years later, on his death-bed, the Duke of Wellington said: "I thank God that I am spared the consumption of the ruin that is gathering around us."

Maybe we of the 1930's can bear our afflictions, after all, and leave a record of the evils of "the good old days" for posterity to read and wonder at.

## HOMICIDAL HUNTERS

The hunting season has brought out a curious comment on the human race. A letter to a newspaper editor calls for a safety campaign to protect hunters from each other. The number of hunting accidents, many of them fatal, is proof that work is needed along this line, but the letter-writer's slant on the situation is novel.

"A man goes into the woods to hunt deer," he says, "and knows full well what his partner looks like. In a few minutes he thinks his partner looks like a wild animal and shoots him. If he is not drunk or does not have poor eyesight, he has deliberately tried to kill him."

"I have heard several men say, all they have to do is to invite a man to go hunting, and if they shoot him, nothing will be done about it. Many men refuse to hunt under such conditions."

Murder isn't really so prevalent or easy as that. No doubt punishment for carelessness would have a deterrent effect on some hunters. Careless motorists may be charged with manslaughter for traffic deaths and punished accordingly if they are convicted. But attributing murderous intent to the army of hunters who go forth at this season for squirrels or rabbits or deer goes pretty far toward libeling the human race.

Don't get the idea that England is not in earnest about that war. They're almost as much interested in news from the front as they are in the cricket scores.

Admiral Byrd's Antarctic snow cruiser wouldn't do for Santa Claus. Santa could never learn to steer all four wheels separately without going in four directions at once.

## THE MUNICH MYSTERY.

The mystery of the world-shaking explosion in the "Cradle of Nazism" at Munich may never be solved to general satisfaction.

Americans at first were disposed to regard it as a real attempt on the part of some individual or group opposed to Hitler to destroy the Nazi government. But the French from the first declared that it was a trick perpetrated by the Nazi leadership to fool the world and arouse the German people to renewed support of the government. The British were inclined to take the same view, especially when the Nazi chiefs so promptly accused Britain of the crime. Suspicion of the Nazis is now very general in America.

"Pertinax," writing from Paris for the North American Newspaper Alliance, gave a clear statement of the French view, as follows:

"The hand of the Nazi police is to be found in that so-called attempt on Hitler's life, as it was detected six years ago in the Reichstag fire. The aim in view was to rekindle loyalty to the Fuehrer among the masses, to prepare them for the difficult and cruel times which lay ahead of them, and to cause hate against Britain to flame up."

It is hard for the Hitlerites to meet this accusation outside of Germany. Will the German people generally come to believe it? Or will they go obediently to war to support their Fuehrer against a hostile world?

## NEUTRAL MAILS

The Netherlands and their neutral neighbors are irked by Great Britain's control of international mail. They claim it is unlawful, but have not been able to do much about it.

The only early remedy they can see is the extension of transatlantic air mail service from Foyne, Ireland, to Amsterdam. Negotiations are now going on between Pan American and Royal Dutch Air Lines to work out some such arrangement.

Flying from Foyne to Amsterdam, however, is difficult business these days. Neutrals and belligerents all look with fearful eye upon planes that pass overhead. A Dutch passenger plane not long ago was fired on by a German plane by mistake, and a passenger was killed.

The Dutch government has obtained approval from France, Germany and Great Britain for a plan to paint all neutral planes orange, making them easily recognizable. Orange has been tested and found to have great visibility. Planes of Belgium, Sweden and Holland are now trying it out.

War gets every country into difficulties—neutrals as well as belligerents. In this war, the neutrals are making heroic efforts to continue to live their lives as normally as possible and to maintain their rights. The cause of decency and honest international dealing will be greatly furthered by every success they win.

An Illinois doctor says the reason why there are more fat women than fat men is that so many married women "don't do enough work to burn up their food." That'll burn 'em up.

The second marker also was registered in the first period with the same pass combination as for the first with Hodge running around right end for the conversion to make the score 14-0.

The third and last tally was registered in the second quarter on an off-tackle smash by Hugh Garland, and a pass, M. Garland to E. Garland for the point, ending the scoring.

Maurice Garland, Hugh Garland and Hodge stood out for Mildred, while Wilson, left half; Cooper, right end, and Sawyer, center, played well for the Bulldogs.

Mildred ran up 14 first downs to five for Dawson.

HOW TO IMPROVE YOUR PERSONALITY

By VERONICA DENGEL

### FALL HOUSECLEANING DIET

How limber are you?

Once again we are running our Ten-Day Housecleaning Diet. If you are in earnest about wanting to change your figure and improve the texture of your skin and hair, if you can use more vitality and endurance, if you have little annoying aches and pains which might be accounted for by an over-acid system, it is time you cleaned your personal house. (Just as you did in the spring-time!) Start each day with a glass of hot water to which has been added the juice of one lemon. This is a wonderful cleanser for the stomach, and clears the way for the digestion of the food which will be taken that day. This is a splendid practice, and when you have once become accustomed to it, it will be a hard habit to ever give up. (But you needn't.)

How limber are you? Can you easily assume the position as shown in the picture today? Or would you get there in sections, and then wonder how to stand up again? Try it. If you have much difficulty, it is high time you began some intensive exercise. Come now, stop being lazy. Make yourself over in the weeks before New Year's. It is the finest resolution you can resolve—but put it into effect now, so that you will have results by the first of the year.

## News of County Home Demonstration Clubs

**Powell Club.** The selection and care of kitchen utensils was discussed by Miss Rettiger at a meeting of the Powell Home Demonstration Club Friday afternoon, Nov. 17, in the home of Mrs. V. T. Haynie. In selecting cooking utensils, one should be very careful to choose those that are made of the best material and those that are most useful for cooking. Utensils should always be kept bright and new looking. They should be cleaned with a powder or steel wool that will not harm the surface of the utensils. Mrs. R. E. Bush was appointed kitchen demonstrator for next year. The club will present the play, "Wagging Tongues," on Dec. 5 in the high school auditorium. After the meeting adjourned, the hostess served a plan, consisting of pineapple salad, cake and coffee, to seven members, one visitor, Miss Rettiger and one new member. As there will be only one more meeting this year, a Christmas tree and party are planned for Dec. 15 with Mrs. R. T. Lonon. All members are invited to come and bring a gift costing 25c.—Reporter.

## INDUSTRIAL LEADERS WARNED BY DIES OF PLANNED SABOTAGE

PITTSBURGH, Nov. 20.—(P)—Industrial leaders in this great steel center scrutinized today a warning from Rep. Martin Dies (D-Texas) chairman of the house committee of un-American activities, that communist and Nazi agents have planned "sabotage espionage and labor strife" in local mills.

Subversive agents are already at work here on methods to "halt at all costs" the shipment of arms and other war materials to the allied armies, Dies said.

The Texan called Pittsburgh, big producer of armaments for the world war, one of the "worst" cities he has encountered "for the amount of known espionage activity."

Dies consulted with 13 key men here yesterday in a preliminary to an extensive public hearing he plans in Pittsburgh in January.

"Both communist and Nazi groups have installed agents in jobs in the key industries," he said.

Dies said he is trying to head off any labor strife by "convincing labor unions that some of their leaders are acting for the good of the United States and Germany rather than the union."

"These leaders don't want to help the union," he said. "They want strikes to prevent war orders from coming. They wouldn't agree to a strike even if all demands were met."

DETROIT, Nov. 20.—(P)—Rep. Martin Dies (D-Texas), chairman of the congressional committee investigating subversive and un-American activities, said in an interview here today that communist and Nazi agents have stolen "important information" of military value from Detroit industrial plants.

Dies was here for a one-day secret conference about such matters. The primary purpose of his committee now, he asserted, was to break up foreign spying and to prevent sabotage in industrial plants.

He cited one case of a lecturer described by him as a Nazi spy who was entertained by a patriotic society, given ready access to numerous plants, permitted to take pictures and to obtain extensive information about industrial processes.

"This information is now back in Germany," he said.

## GERMANY

(Continued From Page One) after the plane took a circuitous route to its home base.

Swiss Protest Bombardment. BERNE, Nov. 20.—(P)—The Swiss government today instructed its minister to Berlin to make "strong representations" to the foreign office against a rain of German bombs on the Swiss town of Basel Saturday which injured three persons and damaged much property.

Warsaw Housing Problem. BERLIN, Nov. 20.—(P)—With harsh winter weather near, the housing problem in Warsaw—especially as it concerns Jews—has become a pressing consideration for the war-ravaged former Polish capital.

Informed German sources said emergency housing had been provided for the Jewish population on certain streets, but they insisted there would be no ghetto.

Germany Files Protest. BERLIN, Nov. 20.—(P)—Germany has protested sharply to the Turkish government against attempts of the Istanbul press, especially the Istanbul "Tan," to disturb relations between Russia and Germany, the German service Dienst Aus Deutschland said today.

BERLIN, Nov. 20.—(P)—Prince August Wilhelm, fourth son of the former Kaiser and a high ranking storm troop leader, told foreign correspondents today that the Hohenzollerns are solidly behind Germany in the present struggle.

"My entire house," he said, "is absolutely against all efforts to injure Germany, and whatever is against the Fuehrer is against Germany."

BERLIN, Nov. 20.—(P)—Beach Conger, correspondent of the New York Herald Tribune, has left Germany with his wife because he considered his usefulness ended by restrictions imposed by Nazi authorities for one of his dispatches.

The dispatch, published last Tuesday, reported among other things alleged discontent among submarine crews in Hamburg. Conger was denied cable, telephone and mail privileges and barred from all conferences.

PARIS, Nov. 20.—(P)—Germans continued widespread scouting flights over France today while the flooded Rhine and other border rivers forced suspension of local operations along the western front.

Military sources said the Germans could be seen erecting dikes on the other side of the Rhine and abandoning some small, outlying defense posts which were flooded. Scouting flights caused alert signals this morning in widely separated points in France.

(British War Secretary Leslie Hore-Belisha, touring the front yesterday, expressed satisfaction with the general situation and said, "Britain is comfortably winning this war.")

"(It is the type of war we do best—just digging in and sitting tight," he said.)

Summing up the war at sea during the past month, a French communiqué last night estimated German shipping captured by French patrols "certainly exceeded by several thousands tons the tonnage of French shipping lost because of the enemy."

## KILLING

(Continued From Page One) tried to kill me," she asserted.

Assistant District Attorney Jimmy Martin said Miss Corinne Maddox, 28, told him "I have just shot Brooks Coffman." On a counter, in front of the woman, were two pistols Martin said.

Coffman was under a charge of assault to murder in the shooting of Miss Maddox last May. Miss Maddox, found stabbed at a gravel pit near Irving, Tex., recovered after several weeks in a hospital.

George Lawton, criminal representative for a Telegraph company, told newspapermen he was sitting in a Main street office when he saw a woman shooting at Coffman. She had a revolver and an automatic pistol.

"She stood over him, about five feet away, firing into him," Lawton said. "He was trying to hold up with one hand and hollering and pleading for mercy."

Martin, who had been attracted to the scene by shots he heard as he walked toward the court-house, said Miss Maddox replaced two pistols in her pockets, stopped to pick up some cosmetics she had purchased, and accompanied him down the street until they met a squad car. She had telephoned police immediately after the shooting.

The suspect was taken to detective headquarters for questioning.

The assault to murder case against Coffman had been called for trial Oct. 9 before Judge Henry Kling, but was passed by the state because of the inability of Miss Maddox to come to court.

On that occasion, the state sent Dr. Horace B. Dunbar, court health officer, to examine Miss Maddox. He reported back the woman's condition would not permit her to come to court and the case was passed indefinitely.

After the stabbing, Coffman appeared at police headquarters and announced "I have killed a woman." Passersby had found Miss Maddox. She told officers she was stabbed at the shooting, according to her, to accompany Coffman to California.

## STRANGE AS IT MAY SEEM; COURTS RULE ON MOOT QUESTIONS

By GLADWIN HILL  
NEW YORK, Nov. 20.—(P)—If you are a lawyer, you have a legal right to build dams in Connecticut.

The attorney general ruled so. In fact, heave, or not recent judicial decisions have added to your bill of rights a lot of things you'd never suspect.

A New York judge ruled that two women behind you at the movies insist on discussing the coming convolutions of the plot, you have a right to blow a Bronx cheer (i. e. "Raspberry") at them.

Another New York judge ruled that it was legal to trumb your nose at somebody if the person was more than 10 feet away.

But a Canadian judge ruled that you can't buy meals on the installment plan.

Canadian judges ruled that Eskimos were Indians—if that affects you. If not, there was a New York court ruling that a rooster is a chicken.

You can't always be sure about those things, though.

A Chicago judge ruled that a woman is entitled to a divorce if her husband slaps her—

But on the same day, another Chicago judge approved of husbands slapping their wives.

If you are grappling with the problem of how much a trained bears ability to box is worth, a New York court has already settled it for you—it's \$12,000.

And an Oklahoma court decided that the inconvenience of being sat on by a horse amounts to \$1,000.

## MACKENZIE

(Continued From Page One) see half a dozen of the many questions asked by my audience at Lasalle.

Question: Suppose the Allies should succeed in crushing Hitlerism, who would they put in its place?

Answer: There is nothing to indicate that they wouldn't permit the German people to select their own form of government, provided this didn't nullify retention of Hitler and his peculiar personal code. The matter of totalitarian government in general is not involved in the dispute.

Question: Is it possible for newspapermen to interview Hitler?

Answer: Hitler rarely talks with the press. Louis Lochner, chief of bureau for the Associated Press in Berlin, is one of the few who have interviewed him. It's my understanding that the Fuehrer doesn't care much for journalists.

Question: What is the personal relationship between Hitler and Mussolini?

Answer: It is generally understood in well-informed quarters that they have little use for each other. The Berlin-Rome axis has been a matter of expediency rather than of personal regard.

Dr. Lawrence was reported to have said he had received an attractive offer from the Texas institution but was considering it only with the thought that the construction of a gigantic cyclotron might not materialize at once at the University of California.

The cyclotron is an atom-smashing machine which he has used in his experiments. He now uses a 2,000-ton smasher.

Texas Bids for Services. BERKELEY, Calif., Nov. 20.—(P)—The University of Texas is bidding for the services of Dr. Ernest Orlando Lawrence, 38-year-old University of California scientist, who won the Nobel prize for physics this month for his work in devising and using an "atom smashing" machine known as a cyclotron.

"It is true," Doctor Lawrence said, "that the University of Texas has made me a most attractive offer."

The physicist disclosed that the Texas institution, fabulously rich because of its ownership of oil fields and other Texas lands, had offered him a large increase in salary, and proposed to build for him a cyclotron more than 13 times as large as the 225-ton one he now has.

He said the offer of a huge cyclotron had really interested him, although he personally preferred to remain here.

## European War to Be Issue 1940 Campaign

ST. LOUIS, Nov. 20.—(P)—Senator Robert A. Taft (R-Ohio) making a hurried trip through six states to "sample republican sentiment," told party leaders at a breakfast meeting today the European war definitely would be an issue in the 1940 election.

Recalling that the United States entered the world war under democratic President Woodrow Wilson, Taft said:

"I cannot believe the American people are willing to trust the democratic party to keep us out of war. The republican party is the peace party, and it will be the peace party in 1940."

## RAINEY NONCOMMITTAL IN CONNECTION WITH OFFER TO LAWRENCE

AUSTIN, Nov. 20.—(P)—A noncommittal statement, high in praise of Dr. Ernest O. Lawrence of the University of California, came today from Dr. Homer P. Rainey, president of the University of Texas, in response to reports the Texas school had offered to employ the noted California atom-smasher.

Dr. Rainey said he had once visited the physicist, who recently won the Nobel peace prize, in physics, and added:

"It goes without saying that any university would be honored to have Dr. Lawrence as a member of its staff. His work as a physicist has attracted international attention and the recent award of the Nobel prize is but another indication of the marked scientific contributions he has made."

Dr. Lawrence was reported to have said he had received an attractive offer from the Texas institution but was considering it only with the thought that the construction of a gigantic cyclotron might not materialize at once at the University of California.

The cyclotron is an atom-smashing machine which he has used in his experiments. He now uses a 2,000-ton smasher.

## ANTI-HITLER NATIVE OF GERMANY FACING DEPORTATION CASE

SAN FRANCISCO, Nov. 20.—(P)—Erich Rix, 38, anti-Hitler native of Germany and former secretary of the German American League for Culture, awaited hearing today in a deportation case to decide whether he should be sent back to Germany.

Rix, who has an American-born wife, was arrested at his home Saturday night on a federal warrant charging that when he applied for American citizenship papers here last year he concealed an alleged criminal record in Germany.

Immigration authorities reported the German case involved "moral turpitude and theft." Rix said his criminal record in Germany consisted of a conviction of smuggling a sack of flour into Germany during the inflation period of 1921, and a term in a Nazi concentration camp for expressing anti-Nazi beliefs after Hitler came into power.

Rix, his wife, Beatrice, and Harry Lundberg, head of the sailors' Union of the Pacific to which Rix belongs, said they believed Nazis in this country "put the finger" on Rix.
